

Assignment No.2

- Samrat Patil

Here's a breakdown of the **key findings and insights**:

◆ 1. Payment Method Distribution

- **Ewallet** is the most preferred payment method (345 transactions), followed closely by **Cash** (344) and **Credit card** (311).
- Insight: Customers are almost evenly split across the three payment methods, with a slight preference for **Ewallet**. Offering all three methods is essential for customer satisfaction.

◆ 2. Product Line vs Gender-wise Total Sales

- **Top Performing Product Lines:**
 - *Food and Beverages*: Highest sales (56K total), with more contribution from **female customers**.
 - *Fashion Accessories* and *Home and Lifestyle* also show high sales, with significant female participation.

- **Gender Insights:**

- **Female customers** lead in *Food & Beverages, Fashion Accessories, and Home & Lifestyle*.
 - **Male customers** dominate in *Health and Beauty* and are nearly equal in *Sports and Travel*.
 - Insight: **Product preference varies by gender**, suggesting opportunities for targeted marketing.
-

3. Date-wise Total Sales

- Sales are **fluctuating daily** with several peaks:
 - Highest sales day: Around **7.5K** in **late February**.
 - Other high points: **Early February, mid-March, and late January**.
 - Several low points: Around **0.9K** in early February and **1.3K** in March.
 - Insight: There's a **weekly or promotional pattern** in spending behavior. Peaks could align with weekends, salary days, or special offers.
-

Overall Business Insights

- Maintain a **variety of payment methods** to cater to customer preferences.
- Use **gender-based insights** to tailor promotions (e.g., female-centric offers in Food & Fashion).
- Study **high-sales dates** to identify repeatable patterns or promotional success.
- Leverage **data-driven planning** for stock, staffing, and offers based on sales trends.
